

NOSEC JSky

— Web Application Security Vulnerability Scanner

NOSEC JSky is another product produced by NOSEC who build NOSEC Pangolin. It helps you scan Web vulnerabilities on your website.

Jsky- Web Application Security Vulnerability

One click start assessment

No technical skills required. JSky can finish black box scanning after click button "start". It's built for Information Security, Developers, QA, Compliance Officers, and Executives - the entire organization to run assessments.

Malware detection

Discover malware and undesirable links embedded in web sites with fully integrated malware testing. To further improve accuracy and performance, it includes an adaptive test process that intelligently mimics human logic to adapt the testing phase to individual applications.

In depth crawling

Crawl support Adobe Flash, JavaScript, AJAX. JSky will extract paths through the JavaScript, fully analyzing how the application changes from the user's perspective, watch the Ajax requests and then make attacks to the server-side application accordingly to reveal vulnerabilities.

Fast and accurate

With patent extensive technology NOSEC provide fast and accurate Web application scanning. It can help dramatically reduce the time needed to perform a comprehensive vulnerability assessment of your applications.
